

AMENDMENT UNDER 37 C.F.R. § 1.312  
Application Serial No. 10/716,475

REMARKS

With respect to the Examiner's Amendment of July 6, 2005, Applicant believes a typographical error may have been inadvertently introduced into claims 1 and 5. In particular, the Examiner's Amendment states that Claim 1, at lines 6 adds the recitation --converting said ECL signals to CMOS signal--. Claim 5 was similarly amended in the Examiner's Amendment.

According to Applicant's understanding, the claim language should recite "CMOS signals", so as to be consistent with the previous claim language. Therefore, Applicant submits the present Amendment which changes CMOS "signal" to --signals--, as shown, to correct the apparent typographical error.

The changes being made are simply editorial in nature and no question of new matter or questions of further search arise.

Entry and consideration of this Amendment are respectfully requested.

Respectfully submitted,

Brian K. Shelton
